-!-CATALYTIC ACTIVITY: Phosphoenolpyruvate + 3-phosphoshikimate - phosphate + 5-0-(1-carboxyvinyl).3-phosphoshikimate.
-!- PATHWAY: SIXTH STEP IN THE BIOSYNTHESIS OF CHORISMATE WITHIN THE BIOSYNTHESIS OF ROWATIC AMINO ACIDS (THE SHIKIMATE PATHWAY).
-!- SUBUNIT: Monomer (By similarity).
-!- SUBCLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: BELONGS TO THE EPSP SYNTHASE FAMILY.

Glyphosate-tolerant 5-enolpyruvjshikimate-3-phosphate synthases.";
Patent number 085633435, 27-MAY-1997.

-!- CATALYTIC ACTIVITY: Phosphoenolpyruvate + 3-phosphoshikimate = phosphate SIXTH STEP IN THE BLOSYNTHESIS OF CHORISMATE WITHIN THE BLOSYNTHESIS OF AROMATIC AMINO ACIDS (THE SHIKIMATE PATHWAY).

-!- SUBCELLULAR LOCATION: CYtoplasmic (Probable).

-!- SUBCELLULAR LOCATION: CYtoplasmic (Probable).

-!- MISCELLANBOUS: RESISTANT TO THE ANTIBIOTIC GLYPHOSATE.

-!- SIMLARITY: BELONGS TO THE EPSP SYNTHASE FAMILY.

RIASTED: PRO01986; EPSP-Syntase.

-!- CATALYTIC ACTIVITY: Phosphoenolpyruvate + 3-phosphoshikimate = phosphate + 5-0-(1-carboxyvinyl)-3-phosphoshikimate.
-!- PATHWAY: SIXTH STEP IN THE BIOSYNTHESIS OF CHORISMATE WITHIN THE BIOSYNTHESIS OF AROMATIC AMINO ACIDS (THE SHIKIMATE PATHWAY).
-!- SUBUNIT: MONOMER (BY SIMILARITY).
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: BELONGS TO THE EPSP SYNTHASE FAMILY.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 3, Application US/08476008
Patent No. 5627061
GENERAL INFORMATION:
APPLICANT: Barry, Gerard F.
APPLICANT: Padgette, Stephen R.
APPLICANT: Stallings, William C.
TITLE OF INVENTION: Glyphosate Tolerant
TITLE OF INVENTION: 5-Enolpyruvylshikimate-3-Phosphate Synthases
NUMBER OF SEQUENCES: 69
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                 ADDRESSEE: Dennis R. Hoerner, Jr., Monsanto Co. BB4F
STREET: 700 Chesterfield Village Parkway
                                                                                                                                                                                                                                                                                                                                                                                                                                                       COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PatentIn Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/476,008
FILING DATE: 07-JUN-1995
CLASSIFICATION: 435
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 38-21(10660)A

Patent No. 5677061

GENERAL INFORMATION:
APPLICANT: Barry, Gerard F.
APPLICANT: Padgette, Stephen R.
APPLICANT: Stallings, William C.
TITLE OF INVENTION: Glyphosate Tolerant
TITLE OF INVENTION: 5-Enolpyruvylshikimate-3-Phosphate Synthases
NUMBER OF SEQUENCES: 69
CORRESPONDENCE ADDRESS:
                     sedinence sedine
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               BB4F
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ADDRESSEE: Dennis R.
